

FODMAP DPE™ is a specialized blend of spore-forming probiotics and digestive enzymes that assists the body in properly digesting highly fermentable foods, commonly known as **FODMAPs** (Fermentable Oligosaccharides, Disaccharides, Monosaccharides, and Polyols). Garlic, onions, apples, and many other nutrient dense foods can be very hard for some to digest. By limiting digestive fermentation, **FODMAP DPE** eases symptoms like gas, bloating, constipation and other digestive discomforts that occur from enjoying **FODMAP** foods.

SUGGESTED USE: Take FODMAP DPE with 8 oz of water at the beginning of each FODMAP containing meal, or as directed by your healthcare practitioner. Additional capsules may be taken for larger meals or during periods of occasional discomfort.*

MAINTENANCE: 1 capsule per meal.*

INCREASED SUPPORT: 2 capsules per meal.*
