Dietary Supplement

A Fresh Brand With an Understanding of the Magnificent Nature of the Honeybees

NaturaNectar understands the nature and science behind the beehive and finds its inspiration there. With the same focus and dedication of the honeybees, our company is dedicated to bringing innovation and natural quality to our customers while committing corporate resources to the important research needed to ensure that honeybees continue to be one of nature's true marvels as well as supporting the surrounding communities that help to harvest our bee propolis in a sustainable way. We invite you to learn more at BeeTherInitiative.com.

Quality from the Source

NaturaNectar's sister company ALMAR Apiary is on location in Brazil at the source of the world's finest and purest bee propolis. For over a decade, we have worked together to develop the tap into the best selection of bee propolis available anywhere in the world and are proud to now offer it directly to you. Groundbreaking products are now at your fingertips directly from the Brazilian honeybees and their bio-diverse forests!

30+ Years Perfecting the Most Advanced Standardized Propolis Extracts

The reputation for quality of Salomon Propolis™ extracts in Scandinavia is over 30 years in the making due to the undisputable scientific evidence and grade as natural medicines. Through our partnership with PRC-Propolis Research Center, these standardized, 100% water-based pure extracts have become the foundation of NaturaNectar™ and its extensive product line.

Bee Propolis is the Best Gift from The Honeybees to Your Health

It's not a coincidence that propolis means (pro= before) + (polis=city). An amazing substance that is strategically placed by honeybees before their hives to serve as the defender of the hive. As a consequence, the beehive is one of the most sterile environments known by man even at high degrees of temperature and humidity. That's why millennia civilizations have relied on bee propolis to support their health.*

You are holding the first Brazilian Red Bee Propolis—only product ever to be introduced to the USA. Highly appreciated by Asians with a stunning 1,860 µmol TE/g ORAC result, this exotic and pure gift from the beehives is one of nature's most powerful antioxidants, even higher than the super-fruits.* Our co-founder Mr. Alessandro Esteves is the pioneer who discovered the Brazilian Red Bee Propolis in its botanical origin (*Chilbergia ecostaphyllum*). In today's cutting edge science circles, numerous research papers have been published on the health benefits of this ruby of the hive.*

Unique to NaturaNectar Red Bee Propolis

The Brazilian Red Bee Propolis offers the highest diversity of flavonoids among all existing types of world propolis. Key nutrients like pterocarpans, flavonones, isoflavones, chalcones, isoflavans, lignans and isoflavonols are all found in this product.

The most exotic and premium bee propolis of the world and the only type of bee propolis to offer an exclusive combination of isoflavones and lignans. These special classes of flavonoids promote a natural hormonal balance* in the human body.

Green Extraction is our patent protected and exclusive extraction method that assures pure flavonoids from bee propolis while eliminating nearly all the impurities and beeswax. Only water is used; No chemical solvents.
