

Are you ready for the **CORTISLIM®** Lifestyle?

Weight loss and weight management are unique challenges for many of us. Certain factors may be responsible for unsightly weight gain, while other factors contribute to an inability to shed unwanted pounds and achieve a toned physique. Studies suggest that stress may play a role in our ability to achieve our weight loss and weight management goals.

While a little stress is good for our bodies, a lot of stress isn't. So, during times of physical, mental or emotional stress, our bodies naturally combat the effects by producing a chemical hormone called cortisol. Small amounts of cortisol are needed to control carbohydrate metabolism, inflammation and cardiovascular function, but too much cortisol for too long can have a negative effect. Preliminary studies suggest that elevated cortisol levels may be associated with increased appetite and weight gain. Regular exercise is one of the best ways to maintain normal stress levels. **CortiSlim® Original** provides additional support for helping to maintain normal stress levels.

Nothing is more important in weight loss and weight management than consuming a healthy and balanced daily diet of proteins, fats and carbohydrates. It is also critical to maintaining optimal health. Our body's ability to efficiently synthesize proteins, fats and carbohydrates plays a key role in our overall wellbeing. When our bodies are deficient in vitamins, minerals, fiber and/or water, our body's ability to synthesize proteins, fats and carbohydrates may be compromised.

Take **CortiSlim® Original** as part of the **CortiSlim® Lifestyle** of stress management, healthy eating, regular exercise and supplementation to achieve your weight management goals. As with any weight loss program, the amount of weight that you ultimately lose will be based on many factors, such as your dietary intake, exercise level, and overall levels of stress.* Learn more about the **CortiSlim® Lifestyle** at www.cortislim.com.

CORTISLIM® Original

3-Complex Weight Loss Formula*

CortiSlim® Original is *New & Improved* to better help you manage your weight loss in 3 distinct ways with its 3-Complex Weight Loss formula. Each unique Complex contains a proprietary blend of nutrients that work in different ways throughout your body to provide focused weight loss and management.*

- **Leptiplex®** - Supports healthy metabolism and thermogenesis with a blend of ThermoDiamine™, Green Tea Extract and Caffeine.*
- **Cortiplex®** - Contains a calming blend of AlphaWave™ L-Theanine and Chamomile to compliment the stress-reducing effects of exercise. As part of a weight loss and exercise program, Cortiplex® may help promote normal stress levels.*
- **Insutrol®** - Supports increased lean body mass, body fat reduction and healthy blood glucose levels already in the normal range with a blend of Cinnulin PF®, Banaba Leaf Extract and Vanadyl Sulfate.*

For more information on the clinical studies conducted on any of the key ingredients found in all **CortiSlim®** products, please visit the CortiSlim® website:

RECOMMENDED USE:

Adults, for the first week, take 2 capsules per day with a meal and a full glass of water. Starting with week 2, increase dosage to 4 capsules per day – 2 with breakfast and 2 with lunch and a full glass of water. By week 3 and thereafter you will be ready to increase dosage to 6 capsules per day – 2 with each meal and a full glass of water. Do not exceed 6 capsules per day.

Take CortiSlim® Original as a daily supplement in conjunction with a sensible calorie diet and exercise plan. Consult your physician before beginning any weight loss program. As with any dietary supplement, individual sensitivity may vary; therefore, it is recommended that you begin using CortiSlim® Original at the entry level dose of 2 capsules daily for the first week, before increasing your dosage to 4 capsules daily in week 2, then to the maximum daily limit of 6 capsules.

WARNING: Do not take if pregnant or are nursing. For adult use only. If you have any medical condition, are taking any medications or are under the age of 18, consult a health care professional prior to use. Discontinue use and consult a physician if you experience any adverse affects.

KEEP OUT OF REACH OF CHILDREN.
