

Suggested Use: Mix 1 scoop of SuperCarb into 12-16 oz. of water. Shake well for 30-45 seconds. May be consumed before, during, or after intense exercise as needed for added energy.

Use the following directions when mixing for group use:

Mix 10 scoops of Super Carb into 1 gallon of water. Shake well for 30-45 seconds.

Mix 50 scoops of Super Carb into 5 gallons of water. Stir thoroughly for 45-60 seconds.

SUPER CARB is a breakthrough in carbohydrate technology designed to fuel performance through the use of the patented carbohydrate Cluster Dextrin®. Unlike typical carbs such as dextrose or fructose, Cluster Dextrin® is a low glycemic, highly branched cyclic dextrin (HBCD) with a high molecular weight and ultra-low osmolality. These properties of HBCD make it highly soluble and promote fast gastric emptying, virtually eliminating the gastric distress often associated with less advanced carbohydrates. Cluster Dextrin® also maintains a slow release, offering the ideal interaction between carbohydrate breakdown and the normal release of free fatty acids. The result is a superior carbohydrate that delivers smooth, constant energy and replenishes muscle glycogen stores without spiking blood sugar levels.†

Albion™ and Calci-K™ are trademark of Albion Laboratories, Inc. U.S. Patent 6,706,904 Cluster Dextrin® is a registered trademark of Glico Nutrition Co., Inc.
