ANDREW LESSMAN

GAMMA VITAMIN E

315 mg Gamma Tocopherol
400 mg Total Tocopherols

GAMMA VITAMIN E is a unique approach to natural vitamin E providing high levels of more protective gamma vitamin E (315 mg), instead of the alpha vitamin E of typical formulas. For good reason, vitamin E is among the most popular separate supplements, but unfortunately, typical formulas contain less protective, synthetic alpha tocopherol. Our **Gamma Vitamin E** focuses on Gamma Tocopherol – the most protective of the four naturally occurring tocopherols. Gamma vitamin E is not available in typical vitamin E formulas, despite its being the most predominant and protective form in nature. The vitamin E content of our diet is extremely low, yet typical supplements bear little resemblance to the forms of vitamin E found in nature. Our **Gamma Vitamin E** is truly complete and uniquely natural focusing on 315 mg of Gamma Tocopherol – Mother Nature’s most predominant and protective form of vitamin E, along with 87 mg of alpha, beta and delta tocopherols. Don’t be fooled by so-called natural vitamin E or mixed tocopherol formulas that deliver little natural vitamin E in its most protective natural form – **Gamma Tocopherol**.
