GINKGO BILOBA 120™

Standardized Ginkgo Biloba Extract
Supports Memory & Cognitive Function

GINKGO BILOBA 120 provides concentrated ginkgo biloba at the standardized levels used in the clinical research. Ginkgo is by far the most well-researched botanical ingredient for memory and brain function, but its benefits require a reliable, standardized extract, which is very hard to find. Remarkably, the ginkgo biloba tree has survived over 200 million years and is one of the oldest living species of trees in the world. Ginkgo has been used in Traditional Chinese Medicine for more than 5,000 years and now, modern science has documented ginkgo's ability to help maintain healthy blood flow to the brain, which is essential for the delivery of oxygen and nutrients that fuel brain function. Numerous clinical studies have attested to ginkgo's role in helping combat the normal, age-related changes in memory and mental function. Our **Ginkgo Biloba 120** delivers the hard-to-find "clinical standard" of ginkgo, providing the research-established levels of ginkgo's active compounds: flavone-glycosides (24%) and terpene lactones (6%). Sadly, most available ginkgo does not meet the clinical standard, which is why we diligently test all ginkgo that we utilize. Each easy-to-swallow capsule also contains a high potency B-complex to assure the greatest benefits from our **Ginkgo Biloba 120**.
