RHODIOLA 250

250 mg Rhodiola Rosea Root Extract

Natural Adaptogen

Combats Stress and Fatigue

Promotes Well-Being

RHODIOLA 250 delivers an exceptional quality, standardized extract of rhodiola rosea root. Rhodiola has been traditionally used as a natural “adaptogen” helping to support the body’s normal response to stress and fatigue, while also promoting an overall sense of well-being. Adaptogens support our ability to adapt and recover from stress, which is an essential part of coping with modern life. For centuries, rhodiola has been used in Europe and Asia to help combat fatigue and promote the body’s natural response to stress and fatigue. Rhodiola has also been recognized for its role in supporting positive outlook and mental focus during periods of stress. **Rhodiola 250** is specifically standardized to deliver rhodiola’s key active compounds, rosavins and salidroside, to ensure the greatest opportunity to experience its many benefits.
