

BEYOND RAW® RE-FEED — maximize your recovery for limitless, unbounded lean muscle potential with this new, more powerful, more concentrated formula. The 25g immediate and sustained-release protein complex is loaded to the max with our most extreme anabolic muscle-mind-body primers to provide you with amazing-tasting, maltodextrin-free recovery power all while you sleep, plus there's more. This powerful muscle fuel has reduced carbs and fewer calories than ever before, plus features the hottest new supplementation methodology in sports nutrition, the Physiobolic Edge. This new system is based off the latest research that targets the following 9 Primal Physiogenic Factors all working to provide you with the ultimate, overnight recovery coverage.*

- Anabolic Hormones
- Anabolic Primers
- N.O. Pumps
- Carbohydrate Metabolism
- Fat Metabolism
- Muscle Cell Energy
- Muscle Cell Protection & Recovery*
- Water Regulation
- Mental Intensity & Neuro Priming

The harder you train, the more your muscles need to recuperate, so kick back and unwind while the powerful **ANABOLIC MAXIMIZER** works both instantly and continuously to provide you with potent recovery support important for the growth and repair of muscles. This includes new and improved sources of the ultimate **Anabolic Primers**: leucine from both a novel potato protein and slow-digesting casein for a sustained supply of amino acids that support powerful anti-catabolic signals to protect muscles from breaking down, plus 600mg Testofen® to trigger the most powerful **Anabolic Hormone** in the body required for growth and peak performance with the added benefit of supporting sexual health.*

Every serious warrior knows you need high-quality rest because intense exercise may contribute to the depletion of critical amino acids and key nutrients. Now you can rest assured knowing that the **HARDCORE MUSCLE SUPPORT SYSTEM** includes a 10g glutamine complex with OT™ technology-enhanced glutamine designed to release slowly over a 6-hour period while providing ongoing amino acid fuel for muscle protein synthesis, immune and digestion support. To further provide you with superior **Muscle Cell Protection & Recovery**, 5mg Lutemax 2020™ Lutein and 100mg of turmeric are two of the many powerful antioxidants included in this potent formula to combat molecular damage that inherently occurs from intense training. Resveratrol is also included to further aid in the delivery of muscle fuel while priming the blood vessels for **N.O. Pumps**.*

After you torture your muscles with extreme training, you need to rest and recover. The **RECOVERY POTENTIATOR COMPOUND** works to aid in restful sleep and further supports nighttime recovery with GABA to target **Neuro Priming**. While the **PM METABOLIC OPTIMIZER** fuels lean muscle and enhances **Fat Metabolism** with L-carnitine, powerful minerals work to support **Muscle Cell Energy**, **Carbohydrate Metabolism** and **Water Regulation** for maximum recovery power.*

BEYOND RAW® RE-FEED supplies the ammunition that every hardcore warrior needs to master extreme training goals and exactly when you need it most — a constant flow of high-quality anabolic, muscle-fueling nutrients. Prepare yourself. Experience the difference. Go beyond basic muscle recovery — get **BEYOND RAW®!**

PHYSIOBOLIC EDGE The Physiobolic Edge is the advanced, performance-based technology powering the science behind GNC BEYOND RAW® with more than best-in-class, cutting-edge ingredients. This new, research-based system advances molecular functions not yet targeted by other products by synchronizing with vital physiological mechanisms and genetic pathways before, during and after extreme workouts that unleash your maximum muscle-mind-body potential. This powerful addition gives hardcore sports nutrition a new meaning: physiogenic performance fuel as you push for a physique like never before, muscle-maximizing size, explosive strength and power.* The Physiobolic Edge targets the exact 10 factors that open the door to extreme results.

Defined by our expert scientists as the "genesis of the Physiobolic Edge," the following **10 Primal Physiogenic Factors** are what you need to support extreme training results.

- Anabolic Hormones
- Muscle Cell Energy
- N.O. Pumps
- Muscle Cell Protection & Recovery
- Fat Metabolism
- Carbohydrate Metabolism
- Increased Calorie Burning
- Water Regulation
- Mental Intensity & Neuro Priming
