

Restore Mood, Energy & Mental Balance

Depression is caused by an imbalance in the brain's neurotransmitters (chemicals which act as the brain's messengers).

However, a variety of factors, including genetic makeup, environment, physical condition, mental stressors, psychological and social factors, interact to bring on active depression.

Zahler®'s MasterMind™ is the only comprehensive formula that acts as a natural antidote to the most common depressive disorders including major depression and dysthymia, and counteracts the debilitating effects of depression whether it is melancholic, atypical, postpartum, or seasonal in its manifestation.

Zahler® MasterMind™ does NOT interfere with prescription medications and may be used simultaneously while the drugs are gradually phased out under medical supervision.

Feel Better, Everyday™
