Ingredients: Gelatin (Bovine), Vegetable Glycerin, Purified Water, Natural Caramel Color, Natural Mixed Tocopherols.

Gluten Free.

Contains Fish (Anchovy, Sardine, Mackerel) Ingredients.

STRONG FAT LOSS*

ARPHEDRAMINE
Fat Loss|Energy Complex™

CAPSI-X™
(Capsicum frutescens)

Arsenal X® INFERNO features a sports performance-driven blend of advanced agents in its Arphedramine Fat Loss|Energy Complex™. This innovative blend combines CAPSI-X™ cayenne pepper (*Capsicum frutescens*) with a complete set of energy compounds to fully support a strong thermogenic effect and powerful results. Capsaicin is a compound well-researched in clinical studies demonstrating increased energy expenditure and support for satiety.*

EXTREME ENERGY*

Arsenal X® INFERNO features a dual-acting blend of caffeine combined with the strength of yohimbe, providing for strong multi-dimensional energy, intense mental focus and advanced thermogenesis.*

ANTI-CATABOLIC AND DEFINITION*

With its Anti-Catabolic|Definition Complex Arsenal X® INFERNO offers the support to help you burn body fat without sacrificing your hard-earned muscle. By retaining more muscle you also create a higher muscle-to-fat ratio, which leads to a higher metabolism rate.* As a result this muscle sparing thermogenic helps support that ripped, shredded, and lean muscular look.*

This complex is also enhanced with C3G (Cyanidin-3-O-Glucosides), a clinically studied compound (found naturally in sources such as blackberries, purple corn, black rice and black soybeans) that has been shown to support several health benefits.* C3G uniquely supports "Nutrient Partitioning", or the shuttling of nutrients away from fat cells and into muscle.* This helps drive the fat loss process, but also diverts nutrients like fat and carbs from being stored as fat to being stored in the muscle. This process is what contributes to "muscle hardening".*

RAPID UPTAKE AND ABSORPTION

Arsenal X® INFERNO's extreme ingredient combinations are delivered through a cutting edge rapid release liquid-gel capsule. This designer delivery system is coupled with BioPerine®, a compound clinically shown to increase nutrient bioavailability.*

DIETARY SUPPLEMENT

LEAN MUSCLE DEFINITION*

muscle SPARING™
muscle TONING™

For an extreme body cutting and lean muscle defining solution, nothing comes close to Omega Cuts® ELITE. Omega Cuts® ELITE's MCT-based Muscle Sparing Blend works in conjunction with its CLA-based Muscle Toning Blend to more readily target fat for greater muscle definition. Omega Cuts® ELITE is an anti-catabolic formulation designed to support energy and fat loss without sacrificing your hard-earned muscle in the process. These blends work in complementary unison to specifically target and shred the fat between the muscle, to help bring out your show muscles!*

MUSCLE SPARING
BLEND.

MCTs (Medium-Chain Triglycerides) enter the bloodstream quickly, immediately acting as an available source of energy, with only a small percent being converted into body fat. They help stimulate thermogenesis, a process where the body generates energy, or heat, by increasing its normal metabolic, fat-burning rate.* Omega Cuts® ELITE's MCTs ultimately help to provide that desirable ripped and lean muscular appearance.*

MUSCLE TONING
BLEND.

Omega Cuts® ELITE also features a Muscle Toning Blend with CLA 95%, the purest, most concentrated form of CLA.* CLA is a fatty acid with a strong and supported reputation for aiding fat loss, and helps to shrink stubborn fat areas, commonly located around the stomach, hips, waist, butt and thighs. This unique blend combines CLA with EFAs (essential fatty acids), and together they help reduce the amount of fat that is broken down, deposited and stored in the body.* This blend is what helps support a defined, ripped six pack.*

Core 95
Complex

VERSATILE FORMULA*

Omega Cuts® ELITE is an extremely versatile sports nutrition product that can be implemented into any supplementation program.* This non-stimulant formula can be used by anyone to support the achievement of training goals. Omega Cuts® ELITE can also be used long-term once goals have been met as part of a training maintenance regimen.*
