

Cranberry is a naturally acidic native evergreen shrub that grows in the north-eastern and north-central parts of the United States, Europe and Asia. Cranberry fruit contains a source of antioxidant compounds (proanthocyanidins) that promote a healthy urinary tract by supporting the health and integrity of the bladder walls.[†]

Nature's Lab Cranberry contains a blend of both cranberry concentrate and organic cranberry powder equal to 5,400 mg of cranberry without the sugar found in traditional cranberry juice.

Warnings: Pregnant or lactating women and people with known medical conditions and/or taking drugs should consult with a qualified healthcare practitioner prior to taking dietary supplements. Discontinue use and consult your doctor if any adverse reactions occur.
