ELECTROLYTE SUPPLEMENT POWDER

It's fun to feel good.

Did you know there are two types of muscle cramps? That's right. If you start cramping during physical activity, that's a sign your body might be deficient in Potassium. If you cramp up after physical activity or at night, that's a sign your body might be deficient in Magnesium.*

Jigsaw Potassium Cocktail™ is especially useful during days of high activity or exercise and contains both Potassium and Magnesium — two essential electrolytes. It also contains Pacific Blue® flake sea salt which has important trace minerals that regular table salt doesn't have.

Finally, we don't use any sugar. Zero. Yes, sugar can give you a spike in energy... but that's really just a band-aid. And most people are (wisely) trying to limit their daily sugar intake!

Pour packet into 16 oz bottle of water, shake & enjoy!
