

Yū Turmeric is a product that combines powerful ingredients to help reduce inflammation, support your immune system, promote calming and wellbeing and aid with digestion.

Our set of natural, bioactive ingredients were created to have a synergist effect in the body to help lessen stress, calm your body and reduce inflammation which can help protect healthy cells and promote overall health. We have been able to enhance this natural absorption process with turmeric and it's most important compound, curcumin. Ingesting curcumin doesn't necessarily lead to health benefits, primarily due to poor bioavailability and absorption. Using our organic fermented turmeric, the body's ability to absorb curcumin increased 17X compared to standard, non-fermented curcumin.

Supplement Facts

Fermented Turmeric - provides strong anti-inflammatory and powerful antioxidant properties and paraprobiotics.

Ashwagandha - May help with stress and anxiety. May help maintain normal cortisol levels.

Saigon Cinnamon - May help reduce blood sugar levels, and have anti-inflammatory and antioxidant properties.

Ginger - May provide digestion support and reduce inflammation.

Magnesium Citrate - May help support digestion & heart health.

Vitamin K2 & D3 - May help support a healthy immune system, antioxidant protection, and bone health.

Turkey Tail Mushroom - May help with immune support.

Black Pepper - Contains a substance called piperine. Piperine is a natural substance that enhances the absorption of curcumin by 2,000%.
