

ProBLEND combines 7 different proteins to fuel your body for a full four hours. Proteins are digested at different rates. By combining different proteins you enjoy an immediate, medium and extended source of nutrition as your body breaks protein down into amino acids. **ProBLEND** is rich in BCAAs and Essential Amino Acids and has Digestive Enzymes for maximum protein absorption.

ProBLEND includes an ideal ratio of protein, complex carbohydrates and healthy oils to support extended time-release of amino acids.

Immediate Release - Whey Protein Isolate, Whey Concentrate and Glutamine Peptides are absorbed within 30 minutes after you consume them.

Medium Release - Egg Protein and Milk Protein Isolate fuels your body with amino acids for 1.5 hours (90 mins). Egg is considered a perfect protein because it has the highest protein efficiency ratio.

Extended Release - Micellar Casein and Calcium Caseinate take much longer to digest. You get a full 4 hour release of amino acids. This makes these proteins ideal for appetite control.
