

A NEW KIND OF FAT BURNER

Your metabolism and sleep cycle are interdependent; studies have shown that a lack of quality sleep can lead to overeating and weight gain, which means taking stimulant-based fat burners later in the day can be counterproductive. LeanFire PM™ was engineered to stack with your favorite daytime thermo to help you burn fat overnight, meaning reaching your weight loss goals can happen even more quickly. This formula is **stimulant-free**, combining the latest innovations in both sleep and fat burning science so you can achieve restful sleep while simultaneously burning calories.

If you are looking for a powerful nighttime fat burner to add to your weight loss stack, look no further than LeanFire PM. You deserve a formula that works with your sleep schedule to help deliver round-the-clock results.

DIRECTIONS

Take 2 capsules daily 30-45 minutes before bed.
