

Bone Solid®

Specially formulated with a unique natural form of calcium as well as other minerals that your body recognizes as similar to its own natural bone composition. ^

Microcrystalline hydroxyapatite (MCHA) is a form of calcium phosphate that is identical to the body's own natural bone composition. 90% of the body's calcium is stored in the bones in this form. ^

Adequate calcium throughout life, as part of a well-balanced diet, may reduce the risk of osteoporosis.

Important nutrients; Vitamin K and D₃ aid in bone formation, play a proper role in bone metabolism, and also protect bones. ^

A patented form of Boron that may help support bone health. ^

Did you know?

At age 30, whether you are a man or a woman, you will begin to lose bone density year after year. An important step is to replenish and increase your body's intake of calcium, and vitamins K & D₃ with Bone Solid's triple action approach.

Triple Action Approach

- 1 Clinically shown to increase mineral utilization:** Provided by Microcrystalline hydroxyapatite (MCHA) which is identical to the body's natural bone composition. ^
- 2 Strengthen bones:** Combination of MCHA, and vitamins K & D₃ build and protect bones. ^
- 3 Supports bone metabolism & health:** Bone is regenerated in the body and goes through a metabolic process. Vitamins K and D₃, Magnesium, Phosphorus, Zinc and Manganese are all important for bone health. ^
