

IMMUNE FACTORS™

Symbiotics Colostrum Plus features key natural Immune Factors such as **Immunoglobulins**, which are types of proteins that are used by the immune system to identify and neutralize foreign objects, as well as **Lactoferrin**, which is a multifunctional protein and **Proline-Rich Polypeptides**, which have a very powerful effect in actively modulating the immune response.*

The Immune Factors found in **Symbiotics Colostrum Plus** have a dual action effect, working systemically throughout the body, as well as in the GI tract, by maintaining healthy intestinal flora in a normal GI tract.* Under the Symbiotics label, minimum levels of these important Immune Factors are verified by laboratory testing.

Quality and Purity Assured. Our colostrum is sourced exclusively from the first milking of cows not treated with rBST⁴ at USDA Grade A Dairies. All colostrum is laboratory tested and verified free from pesticides and antibiotics. Each bottle is double sealed for quality and safety. If either seal is broken or missing, do not use and call 1-800-421-1830. Close tightly and store in cool, dry place (below 75°F), away from heat.

This product is sold by weight, not volume. Some settling may occur.

Warning: If you have a physician-diagnosed health condition, consult your doctor before taking this product. Discontinue use if you experience adverse reactions and consult your doctor.

⁴The FDA has determined that there is no significant difference between cows treated with rBST and those not treated.
