LOT:
BEST BEFORE:

Infant's Probiotic includes 6 strains of beneficial bacteria for infants and toddlers 0 - 5 years old. One serving per day helps maintain healthy intestinal flora, support the immune system, synthesize important B vitamins necessary for development, and is ideal for travelers to maintain healthy flora while away from home.* Since probiotics are living organisms, their potency slowly decreases over time (2% per month). Keep refrigerated whenever possible and freeze to prolong shelf life.
