

Devin Houston, Ph.D., acknowledged inventor and founder of Houston Nutraceuticals, Inc. has 20 years of research experience in enzymes, receptor mechanisms, and nutritional biochemistry. HNI provides effective, safe and affordable digestive enzyme products that support normal digestion... delivered direct from the scientist to the consumer.

A chewable digestive enzyme formulation with a slightly sweet berry flavor designed to efficiently breakdown all food proteins including casein, gluten, meat, and soy. Starts to work in the acid environment of the stomach, which decreases the likelihood of peptides being formed and absorbed in the small intestine. May be used as a companion or alternative to the gluten-free/casein-free diet.*

AFP CHEWABLE

Multiple Protease

An All-Fungal Protease Version of Peptizyde™

- High-Potency Enzyme Combination for Digestion of Food Protein†
- High Dipeptidyl Peptidase IV (DPP IV) Activity Without Papain
- Increases Breakdown of Casein, Gluten, Soy Protein†
- Chewable Version of Peptizyde™ and AFP-Peptizyde
- Safe, Non-Toxic Alternative or Companion to GFCF Diet†

DIETARY SUPPLEMENT

120 Chewable Tablets

Suggested Dosage: Chew 1 - 2 tablets with average sized meals. More tablets can be taken as desired. Tablets may be crushed, using care not to inhale enzyme powder.
