

ITEM NO. HN007-120

Lypazyme is a potent combination of 3 different lipase enzymes. Lypazyme is unique in the use of multiple forms of lipase to ensure complete breakdown of the triglyceride fats found in foods and many supplements. Using only one type of lipase may result in formation of mono- and diglycerides rather than complete breakdown into nutritional short-chain fatty acids†. Lypazyme was developed by Dr. Devin Houston, PhD enzyme biochemist.

SUGGESTED USE: One (1) capsule prior to meal. Capsules may be opened and contents mixed with food or beverage.

Do not use if tamper-proof seal is broken. Keep container closed and store at room temperature or in freezer, but do not place in refrigerator due to humid conditions.

8 98631 00042 7
