

TriEnza with DPP IV Activity from HOUSTON ENZYMES

ITEM NO. HN005-S180

TriEnza aids in the digestion of food proteins (including gluten, casein and soy), carbohydrates, sugars (including lactose), and fats.[†] TriEnza provides a high level of DPP IV (dipeptidyl peptidase IV) activity, which aids in the breakdown of casomorphin (from casein) and glietomorphin (from gluten). TriEnza may be taken with other Houston Enzymes products.[†]

TriEnza was developed by Dr. Devin Houston, Ph.D. enzyme biochemist.

SUGGESTED USE: Two (2) capsules prior to meals. More capsules may be taken as desired. Capsules may be opened and contents mixed with food or beverage. Use care not to inhale enzyme powder.

Do not use if tamper-proof seal is broken. Keep container closed and store at room temperature or in freezer, but do not place in refrigerator due to humid conditions.

[†] These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
