

Unique Multiculture Formula for Children of All Ages*

Florajen4Kids contains four carefully selected strains of beneficial flora that are safe and effective. *Lactobacillus acidophilus*, the same strain used by U.S. yogurt companies since 1973, and *Lactobacillus rhamnosus* are both helpful in maintaining the equilibrium of friendly flora, especially when antibiotics disrupt that critical balance.

Most important and absolutely essential to the development of healthy immune and digestive function in children are *Bifidobacterium* species. Florajen4Kids provides this complex and critical role through an exclusive mix of two strains of these important Bifido cultures.

Money Back Guarantee We will refund your money if you are not completely satisfied with the effectiveness of Florajen4Kids.

*For children under 6 months old, it's always best to consult a healthcare professional before use.
