

The Natural Choice Reproductive Health

Formulated by Leading Fertility Expert, Amos Grunebaum, MD

Formulated by leading fertility expert, Amos Grunebaum, MD, FertileCM® is designed to support fertility by supporting both the quality and quantity of cervical mucus (CM) - the bodily fluid so important to fertility and conception.* FertileCM® supports the body's ability to address one of the most common problems that trying-to-conceive women may face: insufficient cervical fluid that can hinder the transport of sperm to the egg.*

FertileCM® integrates Vitamin C and key nutrients, including the amino acid L-Arginine, which supports the synthesis of nitric oxide (NO), a chemical produced naturally in the body that supports several important bodily functions.* The ingredients in FertileCM® have also been shown to support a healthy endometrial (uterine) lining and support sexual mood enhancement, sensitivity, and libido.*

***These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

Store in a cool, dry place. Keep out of reach of children. Color of this product may vary due to color variations of the natural ingredients. 03FH819.090

FertileCM®

a dietary supplement for women
