Supports Healthy Intestinal
Flora & Digestion

120
Capsules

DIETARY SUPPLEMENT

Here's why ThreeLac is your natural choice – above the rest.

What sets ThreeLac apart from other probiotics is the technology used to keep the friendly bacteria alive. ThreeLac gets LIVE bacteria safely past the acids in the stomach and into your intestinal tract where it does its work.

Eliminating Moisture

The secret to ThreeLac's stable shelf life is our specialized manufacturing process which prevents moisture from reaching the product during production, and the packaging is designed to keep the moisture out.

Complementary Prebiotics

Refined dry yeast powder and dietary fiber as galactomannan are both included in ThreeLac caps to help feed the friendly bacteria in the capsules as well as help feed them once they reach your intestinal tract.

Selection of Strains

The strains of friendly bacteria in ThreeLac were specifically chosen for their unique ability to survive the gastric juices in your stomach and remain alive once they reach your digestive tract.

Controlled Manufacturing Process

Our probiotics are formulated under strict laboratory conditions and manufactured in a sterile and controlled environment assuring the highest purity and quality.

SUGGESTED USE: Adults and children take two to four capsule a day to start. If additional support is desired, you may build gradually to a higher number of capsules per day. Amount needed may vary from person to person. Capsules may be taken any time of day, with or without meals.

WARNING: KEEP OUT OF REACH OF CHILDREN. Do not use if capsule is damaged. Do not take while taking antibiotics. Pregnant or nursing mothers, if under medical care, or if you have a suppressed immune system, consult your health practitioner prior to use.

Store in a cool, dry location. Once capsules are removed from blister pack, they should be used immediately.

Targeted Benefits of ThreeLac

- Promote a healthy immune system
- Improve overall digestive health
- Control occasional digestive upset
- Maintain intestinal flora

Environmentally friendly • Recyclable • Biodegradable
