

PRODUCT BENEFITS: L-Carnitine is synthesized in the liver and kidneys from lysine and methionine, two essential amino acids. Of primary importance is L-Carnitine's obligate role in mitochondrial fatty acid metabolism and energy production.* The heart in particular is reliant on L-Carnitine for the production of energy from fat.*

Directions: For adults, take one (1) tablet twice daily with meals or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
