

ISOTROPIN[®]

REJUVENATION

60 Tangerine Flavor Effervescent Sachets

Dietary Supplement

Isotropin[®] is the most advanced rejuvenation formula available for men and women.

There are many symptoms of aging that negatively affect our quality of life. Increased body fat, loss of lean muscle tissue, lower energy levels, decreased sexual function, weakened immune function, and decreased skin tightness are just a few of them.

Isotropin[®] is formulated to alleviate these symptoms by addressing certain changes that occur during the physiological aging process.

Isotropin[®] nourishes your whole body and helps:

- ▶ Promote Health, Longevity & Well-Being*
- ▶ Improve Energy Levels*
- ▶ Support Endocrine Function*
- ▶ Improves Body Fat Levels and Lean Body Mass*
- ▶ Support Immune Function*
- ▶ And much more...

This unique effervescent delivery system guarantees rapid absorption of the most powerful anti-aging and rejuvenation ingredients available. Effervescent powder helps buffer stomach acids for increased absorption.

Directions:

Dissolve three (3) Isotropin sachets, or amount recommended by your health care provider, in six to eight ounces of water. Let the effervescent powder fully dissolve. Stir and drink immediately. It is best to take Isotropin at bedtime two to three hours after the last meal. Take for five days and skip two days. Repeat cycle. **Alternative Protocol:** Take one Isotropin sachet in the morning 30 minutes before breakfast and two at bedtime two to three hours after the last meal.

We recommend that you take Isotropin for a full 3 months before assessing your results. After the first 3 months regimen, skip 1 month and then repeat cycle.
