ANABOLIC MUSCLE COMPLEX:
PURE ION-EXCHANGE WHEY PROTEIN ISOLATE
+ BCAAs & L-GLUTAMINE

Recover with whey protein isolate (no whey concentrates or blends), rich in essential and branch chain amino acids. NeoCell's whey isolate is developed using selective ion-exchange technology, which results in a highly effective and bio-active performance protein for muscle development. BCAAs and glutamine are added to increase net muscle protein synthesis and to protect against catabolic muscle breakdown resulting from intense exercise.*

CONNECTIVE TISSUE SUPPORT MATRIX:
SUPER COLLAGEN™ BIOAVAILABLE PEPTIDES

Most sports recovery supplements don't target a critical nutritional need in the body – connective tissue. Large muscles held together with weak connective tissues dramatically increases the risk of joint injuries. Support your tendons, ligaments, bones and blood vessels with Super Collagen™ 1&3. NeoCell's absorption-enhanced type 1&3 collagen will provide your body's connective tissue with more of the critical peptides it needs to develop a sturdy connective tissue matrix.*

FORTIFYING NUTRIENTS:
MULTI-VITAMINS + PROTECTIVE ANTIOXIDANTS

Increased activity results in higher oxidation in the body which wreaks havoc on cells. Counteract high oxidation and fight cell-damaging free radicals while increasing your essential vitamin and mineral intake.*
