

SUGGESTED USAGE: As a dietary supplement, mix 1 level scoop (18 g) with 4 to 6 fl. oz. of water or juice. For best results take on an empty stomach 20 minutes before bed or exercise - 5 days on/2 days off.

NOW® Pro-GH™ is an amino acid supplement formulated to support optimal sports performance. Pro-GH™ has Arginine, Ornithine, Lysine, and Glutamine, which are critical for normal endocrine function and help to promote muscle tissue growth and recovery. These same amino acids are also essential for the production and maintenance of nitric oxide (NO) within blood vessels, further supporting the body's optimal response to intense physical training. Glycine, known for its role in glycogen synthesis, has been included to support muscular energy output. Finally, Glutamine and Glycine help to support healthy immune system responses, especially during times of physical stress and intense exercise. NOW® Pro-GH™ thus combines the amino acids needed to help you attain your training goals into one convenient product.*
