

ELIXIR OF THE LAKE™ is a unique and amazing blue-green algae (*Aphanizomenon flos-aquae*) superfood that grows only in one place on earth - Klamath Lake in Oregon. It is a nutritional powerhouse and a true superfood containing high levels of a vast array of unique and extremely beneficial nutrients including chlorophyll, B vitamins, Beta-Carotene (non-toxic Vitamin A), macro minerals, trace minerals, Phycocyanin and Phenylethylamine (PEA) and

trace amounts of the Omega-3 fatty acids DHA and EPA. Blue-Green algae are also among the world's highest naturally occurring sources of protein (50-60%). 100% complete plant protein (does NOT form high uric acid like all animal proteins do).

Supports immune system, brain, joint, nervous, and kidney function* along with physical energy, stamina and a positive and focused mental state*.
100% HARD-CORE PRODUCT

The quality, therapeutic concentration, and affordability of a nutritional product can, and often does, mean the difference between lethargy and energy, good and health, and, quite literally, life and death. I don't want anyone to be weak, ill or dead because they could not obtain or afford the best possible product. If someone does not feel this same way, they should not be in the nutritional product business. I do not breathe this philosophy in both my personal and professional life and continually strive to evolve HealthForce products and offer them at the best possible value - with a reverence for all life. I would rather die than compromise their value.
