

N-TEST 600*

Natural Testosterone Booster: N-TEST 600 is fully packed with 600 mg of Testofen[®], the clinically studied amount necessary to increase free flow testosterone levels up to 98%*. Because N-TEST 600 increases testosterone levels naturally versus synthetically, it provides all the positive bodybuilding results without the negative androgenic and estrogen-related side effects.*

4 Key Ingredients: N-Test 600 includes Testofen and Tribulus Terrestris – **key anabolic-inducing compounds**, coupled with Hesperidin and Transresveratrol – **key anti-aromatase compounds**. Synergistically they help to produce extreme and potent results in increased strength, size, lean muscle mass, and muscle hardness.*

Bioavailability: Delivered via liquid technology N-TEST 600 includes Bioperine[®] for increasing the absorption of the mass-building and strength-increasing ingredients necessary to achieve anabolic results.*

Z-TEST*

Versatile Night-Time Anabolic Catalyst: Use Z-TEST in conjunction with any testosterone supplement to fully support and increase anabolic gains. Z-TEST can also be used alone as a PCT (Post Cycle Therapy) after an intense on-cycle, specifically optimizing healthy testosterone levels during the night-time while also restoring your endocrine system back to its natural homeostasis.*

Anti-Aromatase/Estrogen Blocker: Z-TEST's formulation blocks estrogen, which helps to avoid the negative and adverse androgenic and estrogen-related side effects commonly associated with natural or artificial sources of testosterone supplementation.*

Boosts Natural Growth Factor: Z-TEST supports the release of more natural growth factor, which the body produces less of with age. Z-TEST uses these growth factors to increase muscle hypertrophy, support lean body definition, and improve recovery.*

Restful Sleep: Z-TEST's formulation also includes ingredients used to promote a more relaxing, restful & restorative sleep to aid recovery.*

Level 1: BEGINNER

ANABOLIC SWITCH:

Use N-TEST 600 for 2 weeks, then follow with Z-TEST for 2 weeks. Repeat this process for 8 full weeks.

Advantage: Switching on and off between both products provides a more constant and steady supply of the testosterone needed to achieve and sustain muscular gains over the course of 8 weeks. It also allows the body to maintain a more natural state of homeostasis, to help avoid adverse androgenic/estrogen-related side effects.*

Level 2: INTERMEDIATE

ANABOLIC SHIFT:

Use N-TEST 600 alone for 4 full weeks, then follow up with Z-TEST for 4 weeks.

Advantage: Flood your system with an onslaught of testosterone to maximize full anabolic results in a short time frame. Following with Z-TEST to improve recovery, and to also restore your body's natural testosterone back to normal levels. This staggered, dual attack TEST approach provides the positive anabolic muscle gains without the estrogen-related side effects.*

Level 3: hardcore

ANABOLIC MAYHEM:

Use N-TEST 600 and Z-TEST together daily for 4 intense weeks.

Advantage: Overload your system with a relentless and constant 24-hour barrage of muscle-yielding testosterone to build more muscle, spike performance, and maximize anabolic results. This aggressive approach creates an environment of anabolic mayhem that takes a hold of your system quickly, to produce extreme results in an accelerated amount of time.*
