The quality, therapeutic concentration, and affordability of a nutritional product as, and often does, mean the difference between lethargy and energy, sickness and leshe, and, quite literally, life and death. I don't want anyone to be tired, such or death income they could not obtain or afford the best possible product. If someone does not full piersuite may, they should not be in the nutritional product business. I live and bitains this philosophy in both my personal and professional life and constantly strive is that Health Force products and offer them at the best possible values. I would not die than compromise these principles. Jameth Sheridah, N.D.

This food has been chanced magnetically, homeopathically, and energetically.

THE STORY OF THE WORLD'S #1 SUPERFOOD:

Spirulina has been consumed for thousands of years by many cultures. The Ares gave it to their runners and warriors for strength and endurance. Spirulina is a true superfood. It is densly packed with vitamins (such as non-toxic vitamin A in the forms of carotenoids, B Vitamins), minerals, trace elements, antioxidants, chlorophyll, and phytonutrients. It is over 36 "complete" protein, and, unlike high-uric acid forming protein from animal products that contributes to osteoporosis and can cause kidney damage. Spirulina's protein is easy to Irandle vegetable protein*. Spirulina's phycocyanin content actually helps to regenerate the kidneys and protect against kidney failure*. Being of plant origin and being a whole food. the minerals in Spirulina, such as iron, are NOT toxic. Isolated iron in supplements and from animals can cause serious toxicity. The nourishing. regenerating, immune supportingt, balancing, and immense benefits of Apralina place it firmly as the #1 superfood in existence. Speculina is a FOOD!
