"The quality, therapeutic concentration, and affordability of a nutritional product can, and often does, mean the difference between lethargy and energy, sickness and health, and, quite literally, life and death. I don't want anyone to be tired, sick or dead because they could not obtain or afford the best possible product. If someone does not feel this same way, they should not be in the nutritional product business. I live and breathe this philosophy in both my personal and professional life and constantly strive to evolve HealthForce products and offer them at the best possible values. I would rather die than compromise these principles"

THE STORY OF THE WORLD'S #1 SUPERFOOD:

Spirulina has been consumed for thousands of years by many cultures. The Aztecs gave it to their runners and warriors for strength and endurance. Spirulina is a true superfood. It is densely packed with vitamins (such as non-toxic vitamin A in the forms of carotenoids, B Vitamins), minerals, trace elements, antioxidants, chlorophyll, and phytonutrients. It is over 50% "complete" protein, and, unlike high-uric acid forming protein from animal products that contributes to osteoporosis and can cause kidney damage, Spirulina's protein is easy to handle vegetable protein*. Spirulina's phycocyanin content actually helps to regenerate the kidneys and protect against kidney failure*. Being of plant origin and being a whole food, the minerals in Spirulina, such as iron, are NOT toxic. Isolated iron in supplements and from animals can cause serious toxicity*. The nourishing, regenerating, immune supporting, balancing, and immense benefits of Spirulina place it firmly as the #1 superfood in existence. **SPIRULINA IS A FOOD!**

100% TRUGANIC™: TruGanic™ is a purist, hard-core quality standard significantly beyond Organic. In addition to no pesticides being used anywhere in the growing process, TruGanic™ includes authentic standards for production, non-toxic cleaning agents and pest control, electromagnetic radiation, processing agents, additives, air quality, and actual verification of purity.
