America's #1 selling trace mineral supplement!

ConcenTrace[®] Trace Mineral Drops is a natural mineral concentrate that is so concentrated that 40 drops (½ teaspoon) equals the mineral content of ½ cup sea water with 99% sodium removed. You may expect a wide spectrum of nutritional benefits. For regular or sodium restricted diets.

Suggested Use: Begin regimen by taking ¼ teaspoon (20 drops) for 3 consecutive days. Each day thereafter, increase dosage by 5 drops up to ½ teaspoon (40 drops) once or twice daily. Mix with any beverage or food at mealtimes to mask the concentrated mineral flavor followed by a glass of juice or water.

Re-mineralize Water: Improve the flavor of distilled, reverse osmosis or purified water. Adding 20-40 drops per gallon or to taste (2-4 drops per glass) compares to expensive mineral water and adds a complete, balanced spectrum of low sodium minerals and trace minerals. At 20 drops per gallon, 2 ounces will re-mineralize 48 gallons.

Minor crystallization may occur, but this does not affect the quality of the product.
