America's #1 selling
trace mineral supplement!

ConcenTrace® Trace Mineral Drops are all natural mineral concentrate harvested by using **ConcenFlo™**, our proprietary harvesting process. **ConcenTrace®** contains over 72 naturally occurring ionic trace minerals from the Great Salt Lake with 5% sodium removed.

Naturally, minerals should come from eating a raw food diet. However, even eating a raw food diet isn't enough since researchers have proven that soils have been depleted of minerals. Therefore, if it's not in the soil, it's not in the food. Here's where **ConcenTrace®** comes in: taking **ConcenTrace®** every day means you're getting a full spectrum of all trace minerals, which are the same as all of bioavailable ionic trace minerals that are found in foods!

Suggested Use: This product is all natural, highly concentrated, contains no added preservatives, flavors, or sweeteners and has a very strong taste. We recommend mixing it with juice or food and dividing the serving throughout the day to mask the concentrated mineral flavor. Begin regimen by taking 3 drops for 3 consecutive days. Each

day thereafter, increase serving by 10 drops up to 15 tsp. (480 drops) once or twice daily. **Children age 2-3:** Take 1 drop for every 5 lbs. of body weight. For regular or sodium restricted diets.

Re-mineralize Water: Improve the flavor of distilled, reverse osmosis or purified water. Adding 20-40 drops per gallon or to taste (3-4 drops per glass) compares to expensive mineral water. Minor crystallization may occur, but this does not affect the quality of the product.
