America's #1 selling trace mineral supplement!

ConcenTrace® Kid's Trace Mineral Drops is an all natural mineral concentrate that has been specifically formulated for the nutritional needs of children. We've also added all natural flavors for a great taste that your kids will love!

ConcenTrace® is a unique mineral complex that contains a full spectrum of over 72 naturally occurring ionic trace minerals from the Great Salt Lake. Most of these minerals are in ultra trace amounts, but are still necessary for optimum health during your child's developmental years.**

Consider this: Ideally, minerals should come from eating a raw food diet. However, even eating a raw food diet isn't enough since researchers have proven that most soils have been depleted of minerals. Therefore, if it's not in the soil, it's not in the food. Here's where ConcenTrace® comes in—taking ConcenTrace® every day ensures you're getting a full spectrum of ionic trace minerals, which are the same kind of bioavailable ionic trace minerals that are found in food!

Suggested Use: Shake well. For children age 4 and older, add ½ tsp. to 4 oz. of water once or twice daily. **Children age 2-3:** Add ¼ tsp. to 2 oz. of water once or twice daily. Refrigeration not necessary.
