

Ionic Chromium is a rich, concentrated liquid dietary supplement that provides chromium in an ionic form—the form most widely recognized by the body.* Our proprietary process ensures maximum absorption, while the balanced liquid form provides safety and flexibility.*

The DRV for chromium is 120 mcg/day. However, research has shown that the average American only consumes 50 mcg of chromium per day. Therefore, it may be important to supplement with a high quality chromium supplement such as Ionic Chromium to maintain healthy chromium levels.*

ConcenTrace® is a trade name for concentrated sea minerals from the Great Salt Lake. **CERTIFIED VEGAN.**
