enhance its solubility and intestinal absorption, to create a

SUGGESTED USAGE: As a dietary supplement, take 1 soft-

gel twice daily, preferably with food.

Ubiquinol is the reduced and active form of Coenzyme Q10

(CoQ10) and has been shown to be easily absorbed and read-

ily utilized by the body. The highest concentrations of CoQ10

are found in the heart, where constant energy availability is

critical. CoQ10 is essential to mitochondrial energy production

and functions as a powerful, fat soluble, free radical scav-

enger, providing protection for all tissues, but is especially

important for vascular structures, brain and nerve tissues.

NOW® Ubiquinol CoQH-CF features D-Limonene to naturally

enhance its solubility and intestinal absorption, to create a

product with superior biological value.*
