

SUBSTANTIATED EFFECTS

NOxygen™ is a novel stimulant-free preworkout additive designed to create an oxygen-sparing environment through enhancing vasodilation and blood flow with Nitratene™ while simultaneously volumizing muscle cells and increasing lean body mass (LBM) with HydroMax® water-soluble glycerine. Yet another industry-first for Purus Labs®, NOxygen is perfect for both strength and endurance athletes.

NOxygen™ usage: Add one to two servings to your preworkout beverage 15-30 minutes before training for maximum blood and oxygen delivery. For endurance training, mix with your intraworkout or hydration beverage and consume throughout training.

WARNING: NOxygen™ is intended only for healthy adults above the age of 18. All individuals should consult a licensed healthcare practitioner before using this product. Do not use this product if you have been diagnosed with or have a family history of (including, but not limited to): heart disease, thyroid disease, liver disease, cancer, Barrett's Esophagus, gastroesophageal reflux, diabetes, hypoglycemia, hypo/hypertension, asthma, any psychiatric condition including depression or seizure disorder, or if you are using any other dietary supplement, prescription drug, or over-the-counter drug intended to promote vasodilation, in particular those intended for erectile dysfunction. The combined use of vasodilatory supplements or drugs and NOxygen™ could cause an unsafe drop in blood pressure. Discontinue use and contact a medical doctor immediately if you experience an irregular or rapid heart beat, chest pain, shortness of breath, dizziness, lightheadedness, fainting or presyncope, tremors, headache, nausea, or other similar symptoms. If you are a performance athlete and/or subject to drug testing, please ensure compliance with your regulatory body prior to use.
