

Fast Absorption Formula†

AminoMax is a powerful blend of concentrated high quality amino acids formulated to support muscle growth and recovery. We use only the finest raw materials available to ensure what most companies won't... **RESULTS!** Rather than making tablets that require damaging heat and pressure, **AminoMax** is encapsulated, which means it contains no unnecessary fillers or binders and will easily break down and assimilate faster than tableted amino acid formulas. **AminoMax** is manufactured from a special blend of low molecular weight amino acids from high quality whey protein, an outstanding source of complete amino acids. This whey protein is predigested (broken down) into small mono, di, tri, and poly peptides making it ready for immediate assimilation by the body. High in the Branched-Chain Amino Acids (BCAAs) L-Leucine, L-Isoleucine and L-Valine, research shows that BCAA's are used extensively during intense training and **AminoMax** can help put them back. **AminoMax** also contains vitamins B6, B12, and the minerals calcium, magnesium, phosphorus, potassium, and zinc. These nutrients are useful in many metabolic reactions. Also included is the powerful fat shuttling amino acid L-Carnitine. When used in combination with proper exercise and a healthy nutrition plan **AminoMax** can help you achieve your physique goals by providing you with vital amino acids, BCAA's, vitamins, minerals, and other nutrients in a convenient capsule formula. Take your physique to the Max with **AminoMax!**
