

30 Grams of SPC Protein Per Serving

MAXPRO™ Super Protein Concentrate (SPC) by MMSN was developed to supply your body with an economic, consistent and rapidly assimilated source of pure high-quality protein to be used on a daily basis. SPC Concentrate Protein is derived from an ion-exchange, triple filtration and enzyme hydrolyzation extraction process. Research suggests that by supplying the body with high-quality protein every 3-4 hours, it is possible to elevate nitrogen levels and increase the body's ability to build and maintain muscle growth.¹

MAXPRO™ comes in a convenient 30 gram protein per serving. This will enable you to accurately measure and customize the amount of protein for your individual needs. Many of our customers take between 30 to 60 grams of protein per serving depending on size and other requirements. Now it is convenient and easy to calculate exactly how much protein you are consuming.

Directions: Each scoop of **MAXPRO™** provides 30 grams of SPC "Super Protein Concentrate." You can take up to 3 scoops depending on your personal preference and physical needs. We recommend 8 ounces of your favorite drink for the first scoop, and an additional 4 ounces for every additional scoop. Example: If you want to take two scoops we would recommend 8 ounces for the first scoop and an additional 4 ounces for the second scoop. The total fluid amount would be 12 oz for 2 scoops and 16 oz for 3 scoops. Using less fluid will create a thicker tasting shake. By experimenting with different amounts of liquid, you will be able to determine exactly what you preference is of the pure and versatile Super Concentrated Protein found in **MAXPRO™**.

Super Concentrated Pure Protein Powder

MAXPRO

Banana Flavor!

- *Mixes instantly to provide a concentrated highly bio-available protein*
- *Assimilates quickly, digests easily*
