

100% WHEY PROTEIN

- Scientifically Advanced Whey Blend • High in BCAA's & Whey Peptides
- Added Digestive Enzymes

TRIPLE WHEY PROTEIN by Max Muscle Sports Nutrition is a high quality, economical and powerful protein formulation featuring the latest in protein science and technology. Each protein packed serving provides 26 grams of TriProComplex™, a proprietary high quality blend of Whey Protein Concentrate 80%, Whey Protein Concentrate and Whey Protein Isolate 90%, L-Glycine and the proteolytic enzymes Bromelain and Papain.

The TriProComplex™ found in **TRIPLE WHEY PROTEIN** has an excellent amino acid profile, is highly soluble, rapidly digested and bioavailable. This synergistic formula includes three of the cleanest, purest and most powerful proteins available in the marketplace. The Whey Protein Concentrates (WPCs) are purified by a process of ultrafiltration and ion exchange chromatography. This fraction is rich in beta-lactoglobulin, alpha-lactoglobulin, immunoglobulins IgG, IgA and IgM, glycomacropetides, bovine serum albumin (BSA), lactoferrin, lactoperoxidase and lysozyme. The Whey Protein Isolate (WPI) is further purified by a cross-flow microfiltration/ultrafiltration process to yield one of the purest and highly concentrated proteins ever developed. This process yields a WPI that is un-denatured retaining all the beneficial subfractions in their natural ratios.

The TriProComplex™ whey proteins are complete proteins containing all of the essential amino acids and have the highest concentration of the branched-chain amino acids (BCAA's) L-leucine, L-isoleucine and L-valine available from protein sources. Branched-chain amino acids are highly concentrated within muscles and can become depleted during intense training. Branched-chain amino acids have been shown to stimulate protein synthesis and muscle building (anabolism).

Pure crystalline free form L-glycine has been added to **TRIPLE WHEY PROTEIN** because of its importance as a precursor to creatine and natural GH support. It has also been shown to support natural GH release.

MMSN's Product Development team completed this technologically superior formulation with digestive enzymes to help your body assimilate and digest **TRIPLE WHEY PROTEIN** even more efficiently. We made sure to include protease enzymes to optimize protein digestion. We know that you want optimal assimilation and that every protein gram counts when building, repairing and maintaining muscle tissue.

The best part about **TRIPLE WHEY PROTEIN** is the incredible taste to go along with the superior science. You've got to try **TRIPLE WHEY PROTEIN** to believe it!

KEEP OUT OF REACH OF CHILDREN.
STORE IN A COOL, DRY PLACE AWAY FROM MOISTURE AND SUNLIGHT.
ALWAYS KEEP TIGHTLY SEALED.

CHOCOLATE ICE CREAM FLAVOR

MMSN

100% Whey Proteins • Instantized

TRIPLE WHEY PROTEIN

26g PROTEIN PER SERVING!

DIETARY SUPPLEMENT POWDER • 5 LBS (2,268 g) • Natural & Artificial Flavor

Directions: Mix one scoop in 6-10 ounces of water, juice, non-fat milk, soy milk or any cold beverage of your choice. You can drink it 2-3 times per day as an excellent protein supplement. Triple Whey Protein is instantized so you can stir it with a spoon or shake it without a blender. Try mixing one or two scoops with 8 to 12 oz of your favorite liquid in a blender with 1 cup of ice. Add fresh, frozen or canned fruit like strawberries, bananas and pineapple for a great way to get your daily fruit and make your shake taste even better. Add an extra scoop of Triple Whey Protein for a super protein shake that exceeds 50 grams of protein.
