

SUPERIOR BIOAVAILABILITY & MUSCLE RECOVERY

- HIGHLY BIOLOGICAL AVAILABLE PROTEIN¹ • IMMUNE SUPPORT²
- GH SUPPORT³ • MAXIMIZE MUSCLE RECOVERY

As the newest addition to the Extreme Series, Max Muscle is proud to introduce **Iso-Extreme Advanced Whey Protein Isolate**. This great tasting Whey Protein Isolate supplement contains the highest concentrated percentage of whey polypeptides available (over 90% pure) manufactured by a cross-flow ultrafiltration and advanced microfiltration process. **Iso-Extreme** provides 30 grams of highly biological available protein per serving with very little, if any, fat and lactose! The Product Development Team at Max Muscle Sports Nutrition has specialized in high quality protein supplements for over a decade, and **Iso-Extreme** takes it to the next level. Whey Protein Isolates contain a superior amino acid profile, highly soluble in liquids and has a rapid absorption rate. In fact, since the protein is already pre-digested and primarily in the peptide form, absorption would usually take less than 2 hours after ingestion.⁴ **Iso-Extreme** is ideal for both pre- and post-workouts or during the day to be assured a continuous and adequate amount of amino acids.⁵ **Iso-Extreme** mixes easily and comes in three great flavors.

Whey Protein Isolate is a complete protein containing all of the essential amino acids. It is uniquely rich in certain amino acids, particularly the branched-chain amino acids (BCAAs), leucine, valine and isoleucine which are readily oxidized as an energy source during stress and may help delay fatigue during endurance exercise. Max Muscle's **Iso-Extreme Advanced Whey Protein Isolate** also contains bioactive precursors for the production of intracellular glutathione, a powerful antioxidant and detoxifying agent. **Iso-Extreme** also contains glycine to support the synthesis of creatine and growth hormone production and exercise recovery.⁶

Please read all warnings and directions before taking this product. Consult a Physician before starting any diet and exercise program and before using this product. Do not exceed recommended serving. Exceeding recommended serving may cause serious adverse health effects. Discontinue use and call a physician or licensed qualified health care professional immediately if you experience unexpected side effects. Improper use of this product may be hazardous to a person's health. Drink at least 2 liters of water daily when using this product.

KEEP OUT OF REACH OF CHILDREN.
STORE IN A COOL, DRY PLACE AWAY FROM MOISTURE AND SUNLIGHT.
ALWAYS KEEP TIGHTLY SEALED.
