Qualified SYNBIOTICS™

DIETARY SUPPLEMENT
15 STICK PACKS
Net. Wt. 105g (3.5oz)

**This statement has not been evaluated by the Food and Drug Administration (FDA). This product is not intended to diagnose, treat, cure or prevent any disease.

Intestinal discomfort, such as gas, bloating and loose bowel are generally a result of poor diet, stress, food contaminants (pathogenic bacteria) and antibiotic use - all of which cause changes to a healthy gut environment. Over time, these changes decrease digestive function, reduce absorption of nutrients and lower defense against toxic compounds, which may lead to discomfort and even illness. Maintaining and nurturing an optimal gastrointestinal environment is critical for proper digestion and assimilation of nutrients.

Intestinal Bowel Support is formulated with clinically documented **prebiotic** and **probiotic** combinations to optimize and restore healthy gut microflora, to reduce gas and bloating and to promote regularity.** Clinical data supports the ability of Trans-GOS to increase populations of beneficial bacteria (probiotics) by acting as a preferred food source for colonization, and by helping to diminish harmful strains of bacteria.**

Synbiotics are combinations of both prebiotics and probiotics that work in synergy for the most powerful results to mitigate ailments at the intestinal level. MRM's **Qualified SYNBIOTICS™** are the result of methodically pre-screened 42 different combinations of pre- and probiotics to deliver potent, effective formulas containing the greatest synergistic action - all of which is supported by definitive controlled data.
