

## The Ultimate Flora Probiotic Difference

### HIGHER CULTURE COUNT

Ultimate Flora EXTRA CARE 30 Billion is a probiotic for people who have occasional digestive upsets or are looking for a high culture count probiotic. Each capsule contains 30 billion live cultures of 10 strains of beneficial flora.†

### ONE CAPSULE PER DAY

To receive 30 billion cultures per day, you would need to take 6 capsules of a probiotic with only 5 billion cultures per capsule!

### DELAYED RELEASE CAPSULE

Stomach acid can destroy probiotics. Ultimate Flora vegetable capsules are designed to resist stomach acid more than standard capsules.

No Delayed Release      Ultimate Flora Delayed Release

## Superior Health Begins in the Digestive System

### WHAT ARE PROBIOTICS?

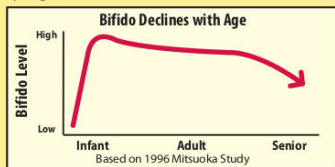

Probiotics are beneficial bacteria that live in the intestines. Lactobacilli probiotics are most prevalent in the small intestine and Bifidobacteria probiotics are most prevalent in the large intestine (or colon). The average intestinal tract contains more Bifidobacteria than Lactobacilli.

### HOW IS ULTIMATE FLORA DIFFERENT?

Ultimate Flora contains 10 different strains of beneficial probiotics (Bifidobacteria and Lactobacilli). Some other brands contain only Bifido or only Lacto. Since you have many different strains of probiotics in your intestinal tract, more strains (B's and L's) may be better.\*

### WHY TAKE ULTIMATE FLORA?

As we age, our level of Bifidobacteria declines. Ultimate Flora EXTRA CARE contains more Bifido than Lacto to help maintain a healthy digestive environment.\*

### What to look for in a probiotic supplement:

- ✓ At least 10 probiotic strains
- ✓ High culture count with Bifidobacteria & Lactobacilli strains (B's and L's)
- ✓ Delayed release capsule
- ✓ Potency until time of consumption†
