

The Ultimate Flora Probiotic Difference

Higher Culture Count

Ultimate Flora Daily Probiotic is an every day maintenance probiotic. Each capsule has 15 billion live cultures of 10 strains of beneficial flora.*

One Capsule Per Day

= 15 BILLION

Why take 3 or more capsules of another probiotic when just one Ultimate Flora Daily Probiotic capsule equals 15 billion live cultures!

Delayed Release Capsule

Without Delayed Release

Ultimate Flora Delayed Release

Stomach acid can destroy probiotics. Ultimate Flora delayed-release capsules are designed to resist stomach acid more than standard capsules.

No Refrigeration Required

Ultimate Flora RTS (Room Temperature Strains) capsules are conveniently sealed in a double-foil blister to shield the probiotics from moisture and oxygen, prolonging potency at room temperature. Refrigeration, while not required, can be helpful during summer months.

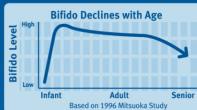

Superior Health Begins in the Digestive System*

How is Ultimate Flora Different?

Ultimate Flora RTS (Room Temperature Strains) Daily Probiotic contains 10 beneficial Bifido and Lacto probiotic strains working differently to help optimize your digestive health. Since you have many different strains of probiotics in your intestinal tract, more strains may be better.*

Why Take Ultimate Flora?

As we age, our level of Bifidobacteria declines. Ultimate Flora Daily Probiotic contains 50% Bifido to help maintain a healthy digestive environment.*

What to Look For in a Daily Probiotic:

- ✓ At least 10 probiotic strains
- ✓ High culture count with Bifido & Lacto strains (B's and L's)
- ✓ Delayed release capsule
- ✓ Potency until time of consumption

Brenda Watson is a leading expert on natural digestive care. Her Ultimate Flora probiotics are formulated to help balance the digestive system, and promote regularity and vibrant health.*
