

Supplement Facts

Serving Size 2 Packs

Servings Per Container 15

Amount Per Serving		%DV
Vitamin B6 (pyridoxine HCl)	500mcg	25%
Niacin (as niacinamide)	10mg	50%

Human Muscle Protein Complex™	4995mg	
Leucine		**
Lysine		**
Arginine		**
Valine		**
Isoleucine		**
Histidine		**
Threonine		**
Methionine		**
Phenylalanine		**
Pro BCAA Complex		
Leucine	3500mg	**
Isoleucine	1690mg	**
Valine	1815mg	**

** Daily Value (DV) not established.

OTHER INGREDIENTS: Gelatin, dicalcium phosphate, microcrystalline cellulose, magnesium stearate, stearic acid, titanium dioxide. Made in a GMP facility on equipment that processes milk, soy, egg, peanuts, tree nuts, fish, shellfish, and wheat.

DOSEAGE: After lifting, there is a critical anabolic "window of opportunity" that exists. To take advantage of this nutritional period, take 2 packs within 15-30 minutes immediately after lifting. Even better, take 2 packs on your training days – the first preworkout, right before lifting, and the second postworkout. If you take a PWO shake, then take the Animal Nitro first, and then wait at least another 30-45 minutes before drinking that shake. When possible, take Animal Nitro on an empty stomach, preferably with 8-12 oz. of grape or other fruit juice.

Pack #001194582

PRODUCT NOTES: Animal Nitro is unique in that it is the only product that utilizes Human Muscle Protein Complex™. HMPC™ is the precise ratios of specific and proven essential amino acids (EAAs), ratios modeled after actual human muscle itself to help optimize and ensure rapid absorption and superior results. EAAs are those amino acids that are, well, essential. The body can't make them on its own. You can only get them from foods or supplements. Animal Nitro is pure, clean, efficient, and effective. Each pack contains only "uncoupled" forms of the essential amino acids. Why? Because when it comes to delivering an anabolic "pulse" necessary for new growth, only uncoupled EAAs are absolutely critical. Taking Animal Nitro is like turning on a light switch. The unique, oral amino formula in Animal Nitro can literally turn the anabolic switch "on" by shifting muscle protein balance from negative to positive. Once on, with the body in an anabolic state, the body can recover more quickly and efficiently for gains. By taking Animal Nitro pre- and post-training, the anabolic switch is turned on and remains on during the most critical nutritional window of opportunity.

WARNING: Exercise good judgment and keep this out of reach of children. To keep it as fresh as possible, store this product in a cool, dry place, away from heat, moisture and sunlight. You know the drill.

OUR IRONCLAD GUARANTEE: Animal is dedicated to being the best in the business, no two ways about it. If this product doesn't meet with your tough requirements for any reason, let us know. When it comes to standing behind our products, we don't mess around. That's the truth.

NITRO

WHO WE ARE In 1983, Animal was founded with the birth of Animal Pak, the venerable training "pack" that started it all. Born from the needs and desires of pro bodybuilders, Animal has grown over the decades. Today, Animal has stood the test of time and been proven in the trenches day in and day out. The same stands for trust, integrity and a no nonsense approach to the game. **WHAT ANIMAL ANIMAL NITRO® IS** Big is big from a distance, but look close up and you'll notice even the largest objects are made up of smaller components. Muscle ain't no different. The basic building blocks of muscle are amino acids. And when it comes to lifting, the most potent amino acids, the most important amino acids, are the essential amino acids (EAAs). Not just because the body can't make 'em on its own either but because EAAs can directly impact the anabolic drive via protein synthesis—before lifting, during lifting and after lifting. Not just any random collection of EAAs will do either. You need the right ones and in the right ratios and in the right form. That's where Human Muscle Protein Complex™ comes into play with Animal Nitro. Animal Nitro uses a precise blend of "uncoupled" EAAs to deliver results. Fast.*
