

**Supportive but not conclusive research shows that consumption of EPA and DHA Omega-3 fatty acids may reduce the risk of coronary heart disease. See nutrition information for total fat content.

Health experts agree: not all fat is bad for you. Krill Oil provides Omega-3 fatty acids which are considered one of the "good" fats important for heart and metabolic health.* Omega-3 fatty acids also help support joint health.*

WARNING: If you are pregnant, nursing, taking any medications or planning any medical procedure, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur. Keep out of reach of children. Store at room temperature. Do not use if seal under cap is broken or missing.
