What is Heartburn?

Heartburn is caused when stomach acid is pushed up into the esophagus. This may result in a painful burning sensation.

For Additional Support Try:

IndigestionSTOP is an advanced digestive enzyme formula with soothing herbs and added HCl to help address low HCl production.*

Too Much vs. Too Little Stomach Acid.
 Heartburn is sometimes caused by the body producing too little stomach acid. For those who do not produce enough stomach acid, a supplement with added HCl is a natural and effective solution.*

DigestMORE Ultra is a maximum-strength digestive enzyme supplement made with 14 plant-based enzymes to specifically target difficult digestion.*

How do Enzymes Help?
 Occasional digestive difficulties such as heartburn, sour stomach, gas and bloating are often caused by a lack of enzymes in the diet. Enzymes help break down food so the body can absorb its nutrients. Because over processing can deplete the natural enzymes in foods, it is important to take a digestive enzyme supplement with every meal.*

Contains no GMOs, yeast, salt, gluten, dairy, animal products, preservatives or artificial ingredients

HEARTBURNSTOP contains powerful herbs and minerals to temporarily reduce gastric acid secretions in the stomach and neutralize stomach acid for fast-acting temporary relief of occasional heartburn.*
 Additional ingredients, in a delicious natural raspberry base, help soothe and protect the lining of the esophagus and the stomach.*

HEARTBURNSTOP includes:

Ellagic Acid: A naturally occurring antioxidant found in raspberries and pomegranates that works to temporarily inhibit gastric acid secretions and produce a short-term reduction in gastric acidity.*

Fava Bean, Apple Pectin, Calcium and Magnesium: Natural herbal and mineral ingredients shown to quickly help neutralize existing stomach acid.*

Aloe Vera and L-Glutamine: Soothing aloe vera extract and the amino acid L-glutamine help to protect the lining of the esophagus and the stomach.*

Papain: A natural digestive enzyme derived from papaya that assists with protein digestion and enhances nutrient absorption.*
