

Discover the *force* of the Whole™

Research has shown that the phytonutrients named hyperforin, hypericins and other compounds found in whole St. John's Wort provide positive emotional health support.* St. John's Force™ combines both supercritical and hydroethanolic extracts to deliver the full spectrum of these beneficial compounds. St. John's Wort is used by many to support healthy mood and sleep.* Our full-spectrum process extracts precious plant compounds to preserve Nature's full complexity, delivering super-pure, super-potent herbal extracts.

Full-Spectrum Extraction: Our Difference

Many companies isolate elements from an herb, concentrate them, and label it "whole herb." New Chapter® delivers the wisdom of *whole food*. Using only natural supercritical CO₂ or traditional techniques of extraction, our Force extracts guarantee the fullest spectrum of beneficial phytonutrients in their natural profile.

Caution: As with any dietary or herbal supplement, you should advise your healthcare practitioner of the use of this product. If you are taking a prescription medicine, check with a healthcare professional before using. St. John's Wort is not recommended for children, or for women who are nursing, pregnant, or considering pregnancy. Although phototoxicity in humans is rare, fair-skinned individuals should avoid excessive exposure to sunlight when using St. John's Wort (*Hypericum perforatum*). May potentiate pharmaceutical MAO-inhibitors. Use of *Hypericum perforatum* with pharmaceutical antiretrovirals such as protease inhibitors, non-nuclease reverse transcriptase inhibitors, and other drugs that are similarly metabolized (such as birth control pills, digoxin, cyclosporine, blood thinners, chemotherapy drugs, asthma medications, or drugs relating to the treatment of HIV) is not recommended and should be done only under the direct supervision of one's healthcare practitioner. Other potential side effects may include gastrointestinal symptoms, dizziness, tiredness, and mild allergic reactions (skin rash).
