

Discover the *force* of the Whole

Sea Buckthorn contains Palmitoleic acid, an Omega-7 fatty acid recognized as one of Nature's "good fats." The full spectrum of beneficial compounds found in Sea Buckthorn *Force*® is delivered using a supercritical extraction, whole-food approach to herbal supplementation. A superfood botanical that's a staple of traditional herbal systems, Sea Buckthorn is also being researched for its many benefits. Our full-spectrum process extracts precious plant compounds to preserve Nature's full complexity, delivering super-pure, super-potent herbal extracts.

Full-Spectrum Extraction: Our Difference

Many companies isolate elements from an herb, concentrate them, and label it "whole herb." New Chapter® delivers the wisdom of *whole food*. Using only natural supercritical CO₂ or traditional techniques of extraction, our *Force* extracts guarantee the fullest spectrum of beneficial phytonutrients in their natural profile.
